

## **AutoScroll Up and Down a Document**

### **By Superior Information Systems**

The included SCROLL.WPM macro will scroll up or down the current document, and you can speed up, slow down, reverse and pause scrolling.

Play the macro and use these scrolling keys:

<b>PRESS THIS KEY</b>	<b>TO</b>
Right Arrow	increase the scrolling speed
Left Arrow	slow the scrolling speed
Up Arrow	scroll up
Down Arrow	scroll down
Spacebar	pause scrolling temporarily
Spacebar	resume scrolling after pausing temporarily
Enter	pause scrolling to permit the document to be edited
F7	resume scrolling after pausing for editing
Esc	exit the macro

*Note: The macro retains its previous settings after each use. For example, if the macro was canceled in the middle of scrolling down at 50% speed, those settings will be retained when the macro is played again on the same or a different document.*
